PROFILE

Frontend engineer with 7+ years building Vue, TypeScript, dashboard, and map-based interfaces. Experienced in turning specialist data and operational workflows into clear product experiences, supported by reusable UI architecture, testing, accessibility, and technical documentation.

COMMERCIAL EXPERIENCE

RiskTech Ltd

Digital Cartographer and Frontend Developer 2017 - 2025

- Progressed from digital cartography into frontend development with Vue, TypeScript, and component-based architecture.
- Co-led custom Mapbox integrations and mapping pipelines for client solutions.
- Led frontend implementation for dashboard and administration features.
- Built a client dashboard administration tool for data integration and configuration.
- Created map review and editing tools for internal quality control and data visualization.
- Collaborated on AI-driven interfaces for visualizing and interacting with client datasets.
- Contributed to component libraries, onboarding documentation, and developer guides.

SELECTED ENGINEERING WORK

Commander Scout

Vue / TypeScript Active

Data-comparison product with typed API clients, IndexedDB caching, virtualized tables, privacy controls, unit/E2E coverage, and CI bundle budgets.

Read case study

Figure Drawing Slideshow

Vue / Workflow UI Active

Timed-session product with quick and structured setup paths, keyboard/focus support, Playwright accessibility/visual checks, CI, and observability.

Read case study

CORE TECHNOLOGY

Frontend

Vue.js, TypeScript, JavaScript, HTML5, CSS3, Sass

Maps and data

Mapbox GL JS, data visualization, geospatial workflows

Product quality

Vitest, Playwright, accessibility testing, performance budgets, CI workflows

Platform and workflow

Node.js, Firebase, Git, agile delivery, Figma, technical documentation

EDUCATION

BA Honours in Visual Media - Games

Ballyfermot College
2013 - 2015

ADDITIONAL

Product areas

Dashboards, admin workflows, client configuration, map products, data review tooling

Interests

Tabletop RPGs, miniature painting, football, cooking

Open to frontend roles focused on Vue, TypeScript, and product UI.
